Corporate Website Replication & Laravel Redevelopment

1. Project Understanding

Thank you for sharing your requirements for the redevelopment of the Aerodry corporate website.

Based on our understanding, the objective of this project is not to change the existing website's core content, product structure or user journey, but to replicate and redevelop the current Aerodry website using the Laravel framework.

The new website will retain the existing website content, page structure and hierarchy, product categories and product information, application segments, existing functionality, navigation, overall user journey, enquiry and contact mechanisms, resources and corporate information.

The website will be rebuilt with a clean, responsive frontend and a robust Laravel-based backend, making it easier to manage, maintain and scale in the future.

Core objective: Preserve the value, content, structure, products, functionality and user journey of the existing Aerodry website while rebuilding it on a modern Laravel platform.

2. Scope of Work

A. Laravel Website Redevelopment

- Laravel-based architecture
- Clean and organized code structure
- Responsive frontend development
- Desktop, tablet and mobile compatibility
- Database-driven dynamic content
- Secure backend/admin panel
- Optimized page structure
- Cross-browser compatibility

The focus will be on replicating the existing website and its functionality rather than introducing a completely different website structure or user journey.

3. Website Pages & Sections

Home Page

- Main banners / hero section
- Company introduction
- Product highlights
- Application segments
- Key company information
- Turnkey solution highlights
- Calls-to-action
- Enquiry links
- Relevant homepage content blocks

About Us

- Company Profile
- Company Introduction
- Mission
- Vision
- Values
- Milestones / Company Journey
- Technology Partners
- Clients
- Testimonials

Infrastructure

- Design & Engineering
- Research & Development
- CAD/CAM
- Manufacturing Facilities
- Production Capabilities
- Quality
- Inspection
- Certifications
- Related infrastructure information

4. Products Module

The existing product hierarchy and product information will be migrated and recreated.

Dosing & Mixing Solutions

- Gravimetric Dosing & Blending
- Gravimetric Dosing Units
- Volumetric Dosing Units
- Volumetric Dosing & Mixing Units
- Existing related products and models

Conveying Solutions

- Hopper Loaders
- Centralized Conveying System
- Powder Conveying System
- Pressure Conveying System
- Conveying Accessories

Drying Solutions

- Hot Air Dryers
- High Flow Hopper Dryer
- Dehumidifying Dryers

- Engineered Dehumidifying Dryer

Crystallizing Solutions

- Crystallizer

Heating & Cooling Solutions

- Mold Temperature Controllers
- Process Water Chiller

Extrusion Process Control Solutions

- Weigh Hopper
- Kilogram/Hr Control
- Kilogram/Mtr Control
- GSM Control

Industry 4.0 / Automation

- Existing automation and turnkey solution-related content

Product Detail Pages

- Product name
- Product images
- Product description
- Features
- Technical information
- Specifications
- Applications
- Related information
- Enquiry option

5. Application Segment

The existing industry/application-based browsing structure will also be retained.

Injection Moulding

- Automotive
- Infrastructure
- Medical & Pharmaceutical
- White Goods
- Health Care
- Consumer Goods
- Caps & Closure
- Technical Molding

Extrusion

- Woven Sacks

- Wires & Cables
- PVC Pipes
- Blown Cast Film
- Sheets & Profiles
- Mono/Multi Filament
- HDPE Pipe & Drip Irrigation
- Lamination

Blow Moulding

- Rigid Packaging / Drum Containers
- Automotive Fuel Tanks & Pipes
- Toys
- Household Products
- Industrial / Consumer Packaging

PET Applications

- PET Bottles ISBM
- PET Preform
- PET Sheets Extrusion
- PET Box Strapping
- PET Mono Filament
- PET Recycling

Compounding & Recycling

- Engineering Compound
- PET Compounding
- Black Carbon Compounding
- PVC Compounding
- Talc / Calcium / Film Compound

Existing application content and relationships with relevant products/solutions will be retained wherever applicable.

6. Turnkey Solutions

- Turnkey solutions
- Centralized systems
- Process automation
- Industry 4.0 solutions
- Integrated systems
- Related solution information

7. Service & Support

- Product Enquiry
- Spare Parts

- Installation
- Maintenance Service

Required enquiry/contact forms will be integrated into the Laravel system.

8. Resources

- Newsletter
- Installations
- Application Videos
- Corporate Video
- Presentations
- Product Brochures
- Case Studies

Where applicable, the administrator will be able to manage these resources through the backend.

9. Blog

- Blog listing
- Blog detail pages
- Blog images
- Blog content
- SEO-friendly URLs
- Backend blog management

10. Contact Us

- Name
- Company
- Location
- Phone
- Email
- Business Sector
- Message / Enquiry details
- Required validation
- Spam protection / CAPTCHA where applicable

Enquiries will be captured and/or forwarded as per the finalized workflow.

11. Laravel Admin Panel

A clean backend will be developed for website management. Depending on the corresponding content structure, the administrator will be able to manage:

- Pages
- Products
- Product Categories

- Product Subcategories
- Product Content
- Product Images
- Application Segments
- Application Content
- Turnkey Solutions
- Services
- Resources
- Brochures / PDFs
- Case Studies
- Videos
- Blogs
- Contact / Product Enquiries
- Other dynamic website content

This will reduce dependency on developers for routine website content updates.

12. Existing Content Migration

The existing Aerodry website will serve as the primary content reference. The redevelopment will cover migration/recreation of:

- Existing textual content
- Existing product information
- Existing product hierarchy
- Existing application information
- Images provided/available for migration
- Corporate information
- Service information
- Resource information
- Blog content
- Relevant downloadable documents

The objective will be to ensure that important existing website information is retained during migration.

13. User Journey

Product-based journey: Home -> Products -> Product Category -> Product/Subcategory -> Product Detail -> Enquiry

Application-based journey: Home -> Applications -> Industry/Application -> Relevant Solutions/Products -> Enquiry

Corporate journey: Home -> About / Infrastructure -> Company Information -> Contact

Support journey: Home -> Service & Support -> Required Service -> Submit Enquiry

The redevelopment will therefore preserve the familiarity and information flow of the existing website while moving it to the new Laravel platform.

14. Responsive Development

- Desktop
- Laptop
- Tablet
- Mobile

Layouts, navigation, images, forms and content will adapt appropriately to different screen sizes.

15. Basic SEO Considerations

- SEO-friendly URL structure
- Meta title support
- Meta description support
- Image ALT text support
- Proper heading structure
- Sitemap support
- Robots.txt
- Canonical structure where required
- Responsive/mobile-friendly pages

Where practical, existing important URLs should be retained to minimize disruption to existing search visibility.

16. Development Workflow

Phase 1 - Existing Website Analysis

- Existing website pages
- Navigation
- Products
- Categories
- Applications
- Forms
- Resources
- Existing functionality
- Content structure

Phase 2 - Laravel Architecture & Database Setup

- Laravel project structure
- Database architecture
- Product/category relationships
- Application structure
- Content management structure
- Admin architecture

Phase 3 - Frontend Development

- Header and navigation
- Homepage
- Inner pages
- Product pages
- Application pages
- Services
- Resources
- Blog
- Contact pages
- Responsive layouts

Phase 4 - Backend Development

- Admin authentication
- Content management
- Product management
- Application management
- Resource management
- Blog management
- Enquiry management
- Other required CMS modules

Phase 5 - Content Migration

- Pages
- Products
- Applications
- Images
- Resources
- Blogs
- Corporate content

Phase 6 - Functional Integration

- Enquiry forms
- Contact forms
- Navigation
- Product browsing
- Application browsing
- Downloads
- Admin functionality

Phase 7 - Responsive & Browser Testing

- Desktop
- Mobile

- Tablet
- Major modern browsers

Phase 8 - Final QA & Deployment

- Content
- Links
- Forms
- Images
- Responsive behavior
- Backend
- Functional testing
- Production deployment

17. Project Timeline

Estimated Development Time: 15-20 Working Days

Phase	Estimated Duration
Website analysis & technical planning	1-2 Days
Laravel/database/backend foundation	2-3 Days
Frontend development	4-5 Days
Dynamic modules & admin development	3-4 Days
Content migration & integration	2-3 Days
Testing, QA & deployment	2-3 Days
Total	15-20 Working Days

The timeline will commence after receiving project confirmation and all required access/content.

18. Commercial Proposal

Total Project Cost	INR 50,000/-
Timeline	15-20 Working Days
Technology	Laravel / PHP / MySQL with responsive frontend technologies

The above amount covers the Laravel redevelopment of the existing Aerodry corporate website as described in this scope.

19. Deliverables

- Fully functional Laravel-based corporate website

- Responsive frontend
- Laravel backend/admin panel
- Existing website content migration
- Product and category management
- Application segment management
- Service & support pages
- Resource management
- Blog functionality
- Contact and enquiry forms
- Basic on-page/technical SEO provisions
- Testing and production deployment

20. Client Requirements

- Existing hosting/server access
- Domain/DNS access where required for deployment
- Existing website/admin access if required
- Original/high-resolution images where available
- Product documents/brochures
- Any content not retrievable from the existing website
- Email details for enquiry notifications
- Required third-party credentials, if any

21. Scope Clarification

This quotation is based on the requirement to replicate and redevelop the existing Aerodry corporate website in Laravel while retaining its existing content, structure, products, functionality and overall user journey.

Any completely new modules, major functionality beyond the existing website, paid third-party services/APIs, major content creation, or requirements outside the agreed scope can be discussed and estimated separately.

Commercial Summary

Particular	Details
Client	Aerodry
Project	Corporate Website Replication & Laravel Redevelopment
Framework	Laravel
Database	MySQL
Website Type	Dynamic Corporate / Industrial Product Website

Particular	Details
Responsive	Yes
Backend/Admin Panel	Yes
Existing Content Migration	Included
Products & Applications	Included
Forms & Enquiries	Included
Basic SEO Setup	Included
Estimated Timeline	15-20 Working Days
Total Project Cost	INR 50,000/-

Closing Note

We understand that Aerodry is looking to retain the value, information architecture and established user journey of its existing corporate website while transitioning to a modern Laravel-based platform.

Our approach will therefore focus on accurate replication of the existing website's content and functionality, responsive development, structured product and application management, and a clean backend that makes future website administration easier and more reliable.

We look forward to working with Aerodry on the successful redevelopment of its corporate website.
